EXPERIENCE

Founding Forward Deployed Engineer

May 2026 – Present

Counter Labs

New York, NY

- 5th Technical member, bootstrapped to 6-figure ARR
- Building ChefOS, the operating system for restaurants, which brings scheduling, inventory, ordering, reporting, and team workflows into one system
- Ingest POS, payroll, and supplier data via APIs and orchestrate multi-agent workflows on top
- Deploy custom AI agents to clients, including Madison Square Garden, currently piloting with 4-5 customers

Forward Deployed Engineer

Jan. 2026 – May 2026

Benmore Technologies

Chicago, IL

- Managed a \$270K+ project portfolio of 6-8 clients from first week, bootstrapped to \$2M ARR with a team of 7 FDEs
- Worked directly with startups and SMBs to translate business needs into products using Django, Next.js, AI agents, deployed on AWS and Vercel
- Accelerated development using Claude Code and multi-agentic orchestration workflows
- Industries included PE (M&A), Voice Agents in Healthcare, Home Services, Legal AI

Software Engineer Intern

June 2025 – Aug. 2025

Alervio Inc.

New Jersey

- Led full-stack development in a team of 4 (Pre-Seed), and integrated LLM-powered features using FastAPI and vector search
- Built production B2C & B2B nutrition/diet platform for restaurants including The Melting Pot
- Developed ML algorithms to process datasets from external APIs & CI/CD pipeline with GitHub Actions
- Migrated to Next.js and Tailwind CSS, improving development efficiency by 40%

PROJECTS

Wavelength | *Columbia Hackathon* | *React Native, Express, PostGIS, Redis, Socket.IO*

- Proximity-based music discovery app: anonymous Spotify broadcasts resolved through PostGIS geospatial queries and Redis pub/sub, streamed to a live nearby feed over WebSockets
- Spotify OAuth 2.0 PKCE auth with session-scoped location data and property-based testing

aSpot | *YC Hackathon* | *Next.js, Supabase, OpenAI, Tavily, Zod*

- Built a 6-stage multi-agent pipeline to generate travel itineraries (intent → retrieval → ranking → planning → critique → persistence) with Zod-typed contracts between agents
- Grounded generation in retrieved data: parallel Tavily searches, LLM extraction into candidates scored against a user taste profile, and an intent-keyed cache to cut retrieval cost

LeaseIQ | *YC Hackathon* | *Typescript, MongoDB, Firecrawl, OpenRouter, Reducto*

- Built an ingestion pipeline scraping 13+ rental sites every 15 minutes via Firecrawl, deduplicating and normalizing 100+ listings per run with parallel batch processing
- Layered document AI on top: Reducto PDF parsing into LLM extraction of lease terms and risk flags, with preference-based alerting over Resend

NextStep | *Capstone Conference* | *Express.js, MongoDB, OpenAI, LangChain, ChromaDB*

- Built semantic job matching on 1536-dim OpenAI embeddings in MongoDB Atlas Vector Search (cosine ANN), with cached profile embeddings and an LLM reranking pass that scores and explains each match
- Shipped a RAG assistant over product docs with LangChain and ChromaDB: chunked ingestion, cited retrieval, and a feedback loop tuning response quality

EDUCATION

The Pennsylvania State University

Pennsylvania

Bachelor of Science in Computer Science

Jan. 2022 – Dec 2025

- *Outstanding Senior Award* | *Global Entrepreneur Scholar*
